

The most attractive story

Mr. LUI CHING LAM

I read a story on the newspaper last week, It's about a girl who studied in Shenzhen got excellent resulting public examination, which got 707 marks. Although she study very hard and got very good result, but still swing to the poor financial background, she cannot chose to study in Hong Kong, as the daily expenses in Hong Kong is very high so what she can do now is to enter the technical college in Shenzhen, she can't even got enough money to enter the normal high school in Shenzhen, It inspires me a lot as when I saw the students in the school, and got many good facilities at school, they don't have to worry about themselves, they are really fortunate. So I hope our students will work harder and treasure what they have at the moment, as fortune is not a must to every body on the world!
