

My First Birthday Party

2E Hui Ka Yiu

Last year, I had a birthday party at home. My mother bought a chocolate cake, some snacks and soft drinks for the party. On that day, I woke up early and dressed myself quickly to wait for my friends. I had invited a lot of friends to come to my birthday party, and I was so surprised that they all came.

In my birthday party, my friends and I played games happily. After playing the games, we ate the chocolate cake and the snacks. We chatted and laughed together. I also received a lot of presents from my friends.

I felt really happy on that day because it was my first birthday party.

Teacher's Feedback : Simple content, but it shows the student's excitement of having her first birthday. (Miss Louisa Chan)

Food For Thought : Have you ever thought of your mother when you are having your "happy" birthday?
