

## A Biography About An Admirable Person

3B Yuen Chun Kit

Kaoru Amane is a Japanese. She was born on 8th April. Kaoru Amane is 160 cm. tall. She is a singer as well as an actress. She made a movie called “Sun of the song”. It impressed people so much that they began to like her. On 13th August 2006, she released her first CD album. It was sold all over the Far East. I like listening to her songs. “Sun of the song” and “Stay with me” are her most popular songs. She was educated up to Form Seven only.

Her CD album won her the award as the top singer, and she won many prizes as the top actress as well. She was twenty years old then. She might travel to Hong Kong and sing songs. I want to see more people come to listen to her singing. Like me, I listen to her songs every day. If she comes to Hong Kong, I will be very happy to meet her. I want her to sing more good songs for us all.

Kaoru Amane will always be my favourite singer. I love her very much. I want her to make more movies, because I like seeing her in them. I even dream that one day she will give me her CD album with her autograph on it.

Since she is a hard-working girl, she can be famous worldwide one day.

She is a caring and conscientious person. Although she has a very tight traveling schedule to follow and she has to be away from home during festivals and holidays, she will never forget to call her family. Like many other singers, she is a real family woman.

When Kaoru Amane started her career, she was very shy. This working environment might make her very uncomfortable at times. However, what we know for sure is that although she likes quiet moments at home, she is much less shy now!

Teacher’s Feedback : There is a good flow and well expressed thoughts in your writing.

This makes it easy for your readers to follow your ideas and enjoy reading your essay. (Mr. Louis Tsang)

Food For Thought : Wouldn’t it be nice to learn the secrets of Kaoru’s success as a singer as well as an actress?
