

# Improve The Academic Standard In The School

5C Hui Yau Po

Recently, our school's academic standard has apparently been falling. As the president of the Student Union, I would like to make the following suggestions to deal with the problem.

## Implementing a reading scheme

Since many students in our school never read books other than textbooks, they don't have many chances to enrich their knowledge. I suggest our school implement a reading scheme. If a student reads one book per week, the school will give him/her a gift for encouragement. This may improve the students' reading motivation.

## Using multimedia for teaching

Most of the students find the lessons boring. Therefore, they tend to day-dream in class. I suggest the teachers add more multimedia elements, such as animations, to their teaching. The students may learn better in this lively way.

## Adopting small-class teaching

There are about 40 students with varied academic standards in a class. One teacher cannot possibly cater to all the students' progress at the same time. To deal with that, small-class teaching can be adopted. In a smaller class, the teacher is able to pay more attention to each student and keep track of their learning. As a result, students' results may improve.

In conclusion, I hope that the academic standard in the school could be improved with my suggestions being adopted.

Teacher's Feedback : These are sound suggestions. If these measures can be implemented effectively, the school's academic standards should improve. (Miss Melody Lai)

Food For Thought : What are students' roles in improving the school's academic standards?
