

My Role Model

2D Lai Wing Yan

Good morning.

Today, I will do a presentation on my role model. My role model is Stephen William Hawking, who is a very famous scientist.

When he was 21, he began to suffer from a disease that has since made him unable to move freely. Having suffered from this disease for more than twenty years, he still has not given up exploring the laws which govern the universe despite his physical disability.

I really admire him for the laws he discovered.

This is the end of my presentation. Thank you.

Teacher's Feedback : It is undeniable that Hawking is a brilliant scientist and there are a lot of things that we can learn from him. You can tell us how he became such a great scientist and what his biggest achievement is. (Mr. Raymond Pun)

Food For Thought : If you were Hawking, what would your life be like? Would it be a different one? Why?
