

## A Film Review: “Back To The Future” 2E Chan Ka Yee

The name of the film is “*Back to the Future*”. The director of this film is called Robert Zemeckis. The main characters are Marty McFly (starring Michael J. Fox) Dr. Emmett Brown (starring Christopher Lloyd) and George (starring Christine Glover). The duration of the movie is 116 minutes. It is a science fiction and comedy film.

The plot is that a boy is invited by his neighbour to see his latest invention — a time machine. While they are trying it, some terrorists go after them and Dr. Brown is killed. Marty goes back to the year 1955 and helps Dr. Brown to complete the time machine in order to bring him back to the future. During his stay in the past, he accidentally runs into his dad and his mum. But his mum falls in love with him. This may mean that it will change the history of their lives and he needs to direct their lives back to the normal course. His dad, George McFly, likes his mum and doesn't know how to express it to her. Marty shows him some ways to do so, but his dad fails almost every time.

The time machine has to be finished or else he will have no chance to get back to the future. Marty has to find the way as fast as he can. At the same moment, he secretly asks his dad and his mum to a party. And his dad finally hooks his mum's heart and she becomes his wife. Finally, we are awed to see how he completes the time machine. We all wonder whether he can travel back to the future.

I like Dr. Brown because his appearance is just like Frankenstein. I also enjoy his acting. He gives me a very deep impression. I dislike Marty's dad because he is stupid and easily bullied by other gangs at school. So he is an introverted person. His appearance is awful.

Overall, the picture is excellent. The special visual effects are brilliant. The story is creative and unique. Some of the scenes show us some scientific facts, so it is educational. Finally, I would like to introduce this film to you. I hope you will enjoy it when you watch it.
