## A Technological Nightmare

5C Justin Ho

It was a nightmare. Something unexpected and horrible took place while my parents and I were sitting in the living room, watching the documentary on television about making a robot.

I remember that it was a calm and peaceful night before the robot's attack. "Ah...... Help! Help!" We suddenly heard someone screaming sharply and asking for help. Then, my mother was very nervous and went to draw the curtains aside. At that time, we were all shocked by what we saw. There was thunder and heavy rain, which suggested that a disaster would happen in a short time. Then we saw a malfunctioning robot which was like a monster. It was breaking the factory gate violently and trying to escape. Frightened by the robot, the people lost control and were running across the road hurriedly.

Realizing that there was no time to lose, my parents and I ran out of the house and joined the crowd. The robot followed us and destroyed the cars, railways, traffic lights and all the things it passed by. Suddenly, the robot caught a little and lovely girl as we all were running toward a protective dome. The girl's mother cried out sadly and tried to save her daughter. However, the cruel robot used his laser guns to shoot at the crowd and she failed to protect her daughter from the robot.

We arrived at the protective dome. But the uncontrolled robot beat the door fiercely. However, we all calmed down to find a solution. Suddenly, a brave man stood up and brought a sword with him. He fought with the massive robot and suffered an injury. Nevertheless, he cut the robot's head with his sword while a soldier flung a bomb at the robot. Eventually, we, as well as the lovely girl, were all saved.

The City Council later explained to the people that the malfunctioning robot was a product of the Artificial Intelligence Council. The Artificial Intelligence Council apologized for its mistake in making the root. Also, the City Council said it appreciated our solidarity and wholeheartedly hoped that this kind of crisis would not happen again in the future.

 $\begin{tabular}{ll} \textbf{Teacher's Feedback:} & The essay is very vivid description and appropriate \\ & use of adjectives to arouse readers' interest. (Miss) \\ \end{tabular}$ 

Yip Mee Yin)

Food For Thought: Robots or so-called artificial helpers can be very useful to mankind but what do you think about

the threat of robotic weaponry and the impact of

automation?
