

## A Scary Dream

4D Lydia Kwong

I sank into a deep sleep and had a bad dream.

In my dream, the ship I took had sunk. The minute before the ship sank, I was swimming in the beautiful pool on the ship and my sisters were playing with a ball happily. Suddenly, water rushed into the ship as if a tsunami had occurred. I was washed from the ship into the deep sea. In just a few seconds, I lost my consciousness in the water.

When I regained my consciousness, I found that I had been washed ashore. I was lying on a beach. My whole body was painful and I was extremely hungry. I stood up slowly and looked around, feeling amazed. I thought all the other people on the ship must have died, but I was lucky enough to survive.

I found that there was a forest nearby. Suddenly someone attacked me from behind! I shook my body to get rid of him. A man dressed like a cannibal was standing there. Then more and more fierce-looking men rushed out from the forest, but they just observed me from a distance.

I was shocked and scared because I knew that cannibalistic tribes eat humans! However, after a minute, they dropped their weapons and all kneeled down! I was surprised to find that they respected me and treated me as their leader. A few days later, I understood that they regarded a white man appearing on their island as an angel. Luckily, I did not have to eat human flesh.

Some days later, I had learnt their language and culture. I taught them simple technology. They learnt so quickly and my kingdom developed rapidly in just a few years.

The cannibalistic tribe chose a beautiful woman to be my wife. We had three children. One night, when I was sleeping in my cave, I heard some noises. I found that my children had brought the whole cannibalistic tribe into the cave and said that they were the new kings starting from that moment. I was puzzled while all of them jumped onto me and started to eat me. I was shared among the people. I died as one of them tore my stomach and heart into pieces.

I woke up from my dream. My whole body was still 'intact'. Since then, I am so scared to hear the term 'cannibalistic tribe'.

**Teacher's Feedback : It was a horrible dream! People need to be prepared for any accidents when they go travelling! (Miss Chan Mei Ling)**
