

My Favourite Sport

1B Yip Ka Ho

In this article, I would like to tell you about my favourite sport which is football.

I first tried playing football three years ago after my friend told me football was a fun sport. Now, I often play it with my family twice a week. At first, I thought playing football was difficult. However, it took me only a month to learn it. It is an easy sport to learn. I enjoy playing football because it is an exciting and fun sport.

Football is becoming popular with teenagers in Hong Kong. There are a lot of inter-school football competitions among secondary schools. You can go to a public football field to play football during summer time.

Football players cannot use their hands to touch the football. If a player touches the ball, that player will receive a penalty. For beginners, you could wear a pair of sneakers; otherwise you will twist your ankles easily.

From my personal experience, playing football is easy. You should try it out!

Teacher's Feedback : Alex, Great job! I can see that you like playing football very much. Your writing is well-organized. It is good that you talk about the rules and give advice on playing football. I would like to hear more about your personal experience. Keep up your good work! (Ms Cheng Kit Wai)
